Subject: Ordinance 5.22 Work Session

I understand that there is an upcoming meeting on February 14th, 2018 to review ordinance 5.22 regarding wind energy systems. I would like this email to serve as my written comments relating to the matter.

I request that ordinance 5.22 be edited to disallow commercial wind energy systems in Codington County.

I understand the revenue is attractive to the county and some landowners, however, I do not believe there is a price that can buy quality of life. The quality of life I currently enjoy on my farm will be disrupted if commercial wind towers are built here. Also, as I know my quality of life would be impacted, it is even more unfortunate to know that the future generations will be impacted as well due to the extremely lengthy contracts that are being presented to landowners.

Thank you for this opportunity for input.
