Subject: Wind Ordinance Discussion

Luke,

Please find attached a memorandum prepared by our consultant outlining the science behind the different siting criteria that, as an industry, we typically utilize on our projects. We as a company apply these even when there may be more lenient siting policies in place as we find our self-imposed criteria mitigate many of the impacts, perceived or real, that adjacent landowners may experience with regards to these projects. Dr. Ollson, has testified before the PZ board before on the Apex project, and we will also be using him for similar testimony. If you have any questions or concerns or would like any additional information please feel free to contact me at your convenience.
