Subject: Set Back Zoning for wind farms

Luke, It is my understanding there is a proposal for wind farms in the South Shore area. It is also my understanding that Codington County has an ordinance of wind farms being 1,000' from city limits. Whereas we have in Florence lake access that is used by several people for fishing both in the winter and summer, as well as South Shore having camping and other recreations surrounding Punished Woman's Lake, we would like to see the zoning ordinance for the setback increase to be more than 1,000 feet. I feel 1,500 feet to 2,000 feet would be more appropriate to keep these wind farms farther away from our small towns in Codington County.

Thank you.
